We are also preparing written policies that strictly prohibit the use of slavery or human trafficking in our supply chain and any part of our own business. We are introducing internal training programmes and reporting procedures to develop awareness and to encourage staff to raise issues, make suggestions, voice grievances and report suspected slavery and human trafficking.

Our focus for the current financial year will be to conduct internal training and to introduce a supplier code of conduct requiring all suppliers in our direct supply to sign a sustainability statement agreeing to comply with our requirements in relation to forced labour, slavery and human trafficking.
